

Corporate Customers Expect Mobile Based Banking Services

To meet corporate customer expectations, banks must keep pace with technological innovations by offering treasury management services on mobile devices. Corporate customers are using smartphones and tablets for other aspects of their business and expect the same cutting-edge technology from their bank. Additionally, bank treasury management apps must offer a user experience that is as good or better than the other mobile apps they use. As the mobile revolution continues, these high expectations will only increase.

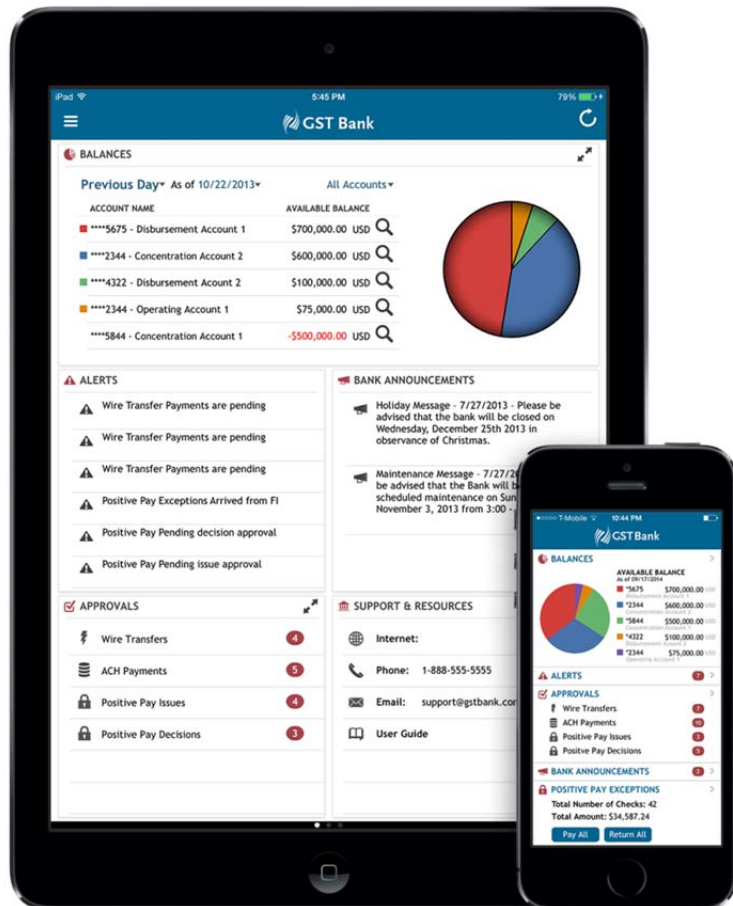

Superior Apps from a Team of Treasury Management Experts

Treasury Management Expertise – Generated Systems Technologies (GST) is a small company based in Atlanta, GA with decades of experience developing treasury management software for banks. The size of our company combined with a deep understanding of the business allows us to quickly deliver high quality treasury management solutions.

Best User Experience – Native apps have defined the user experience that customers expect on their mobile devices. As such, the Mobile Treasury Management apps run natively on iPhone®, iPad® and Android®. Treasury management services are delivered as a series of widgets that both look great and are intuitive to use.

Expandable Mobile Platform – The GST Mobile Treasury Management Apps were designed from the ground up so that additional functionality can quickly and easily be added. As new widgets are added, the platform ensures a consistent user experience. Additionally, each widget consumes bank web services independently so the mobile app can communicate with various bank systems.

Source Code License – GST offers a source code license for the Mobile Treasury Management apps which gives the bank the benefit of a quick time to market as well as ultimate control of the software.

Treasury Management Widgets:

- Previous Day & Intra Day Information Reporting
- Transaction Approval
- Positive Pay Exceptions
- Announcements & Alerts
- Loan Reporting
- Loan Payments
- Support & Resources
- And More!

Mobile Treasury Management apps are currently available for iPhone®, iPad® & Android® smartphone.

iPad and iPhone are registered trademarks of Apple Inc. in the United States and other countries. Android is a trademark of Google Inc.
